

H. C. NUTTING

A Terracon COMPANY

Geotechnical, Environmental, Construction Materials and Facilities Services

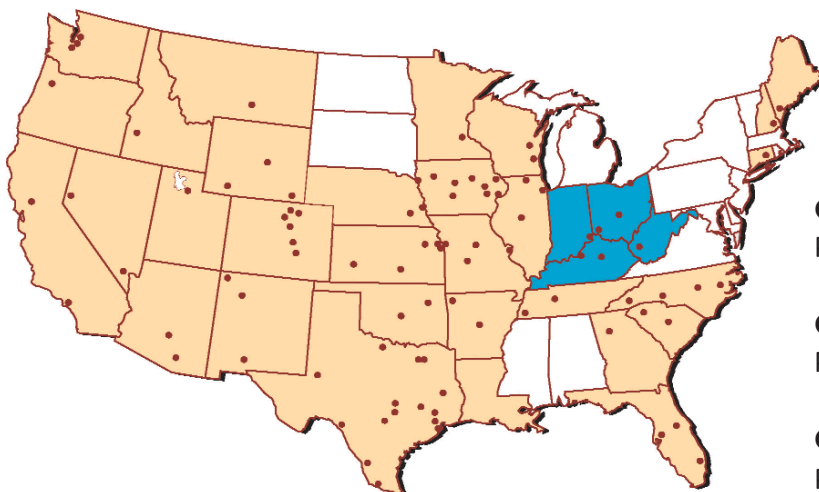

Overview

H.C. Nutting Company (HCN) joined Terracon in 2007 after operating in Ohio, Indiana, West Virginia and Kentucky since 1921. Terracon is a 100 percent employee-owned consulting engineering firm that has provided quality engineering services to clients since 1965. From its roots in geotechnical engineering, Terracon has evolved into a successful multi-discipline firm specializing in geotechnical, environmental, construction materials engineering and testing, and facilities services.

In recent years, Terracon has consistently achieved growth above the industry average. Just 13 years ago, the company had only 18 offices in the Midwest. Today, Terracon has more than 2,500 employees and over 90 offices in 33 states.

Terracon's growth is evidenced by a current ranking of 50th in Engineering News-Record's 2006 list of Top 500 Design Firms, as compared to a ranking of 183rd in 1991. Our growth and development can be attributed to a commitment by employees to be responsive to clients, an emphasis on providing quality services and our leadership's ability to astutely take advantage of new opportunities and technology.

Built upon more than 40 years of success, Terracon is a client-driven company that values its employees, as well as the strong relationships built with clients. By providing multiple related service lines, we provide clients an easier way of doing business that saves time and money.

Terracon's services are available in all 50 states.

Mission

Delivering Success for Clients and Employees

Vision

We continue to view our company as a dynamic and growing consulting firm providing multiple related service lines to clients at local, regional and national levels. Our services are delivered on a timely basis with consistently high value and attention to client needs.

Competitive Advantages

- Top Provider

Why Choose HCN/Terracon?

Terracon provides services on thousands of projects each year. Our culture, systems and structures enable us to excel at both small and large projects. By combining our national resources with specific local area expertise, we consistently overcome obstacles and deliver the results our clients expect.

Whether you do business down the street or across the country, we offer a variety of related services through a national network of more than 90 offices to meet your single- or multi-site needs. Our responsiveness, high quality deliverables, practical solutions and competitive fees afford clients with an easier way of doing business that saves time and money.

Services

Geotechnical Services

- Subsurface exploration and testing
- Foundation analysis and design
- In-situ testing and performance monitoring
- Earth structures, slopes and retention systems
- Dynamic analysis and evaluation
- Soil stabilization and ground improvement
- Groundwater control
- Pavement design and subgrade evaluation

Environmental Services

- Site assessments and investigations
- Remedial design and implementation
- Brownfield/site redevelopment
- Natural resources/wetlands delineation/mitigation
- Industrial hygiene, health and safety
- Asbestos/lead/mold/indoor air quality
- Regulatory compliance
- Environmental management systems
- Solid waste planning and design

Construction Materials Services

- On-site observation and monitoring
- QC/QA programs
- Field and laboratory testing and analysis
- Concrete, grout and asphaltic concrete design
- Structural steel nondestructive testing
- Construction material selection and compatibility
- Forensic evaluations and in-place construction materials evaluation
- Pavement materials engineering and construction management

Facilities Services

- Property condition assessments
- Facility asset management
- Seismic risk analysis
- Forensic investigations
- Life-cycle cost analysis
- Environmental due diligence site assessments
- Regulatory compliance auditing and training
- Remediation design and implementation

“Terracon is an outstanding firm with a tremendous infrastructure. Joining Terracon will enable HCN to continue to grow and better serve our clients. From my perspective, two of the best just got better,” said Jack Scott, HCN president.
